Aleppo, August as. The Turbulay that they have not for the Mospe to the Appropriated the calamity of the Mospe to the degree they have intely in Relicra and Begdad.—On the Hosh of January, in the plague broke out in the fabrate of the last mentioned place, and Mospe to spread into the city; and in the months of February, March, and April, its progress was so capid, that out of 400 ood inhibitants, sthere remained but a sourch part. The inhabitants of Hela, Iman Aly, Iman Hessein, and Iman Monsia, all proved the victime of the contagion.

The pilgrims who came to those places in April, as ufuel, to pay their devotions, found anthing but dead carcalles, and emp-ty habitations. The pilgrims from Iman Aly, and the Jew families who had eleaped from Bagdad, went to Baffora, and carried the contagion thither. Towards the end of March the Christians and Franks took the necessary cantions to escape the infection: But the Muselmen felt the effects of it most dreadfully. Eight thousand Turks, in one quarter of the town only, died between the 15to and 25th of April; and out of 500 domedies belonging to the Governor, he had but one flave left alive, who was employed in fetching rice for the fublikance of his mafter it There were 200,000 in that city, out of which so, oso died, good escaped into the Perlian Gulf, .. 5000 others necovered from the diffemper, and 10,000 were fo happy selito elcape the infection. The hot: weather in May put's stop to the distamper at Bagerd and by the 10th of June Basters was free from it. An Armenian Roman catholic prieft, 80 years, of age, who practifed as a phylician, entirely escaped the in-festion, the exposed to the utmest in relieving others. The tribes of Arabs, encamped between Baffora and Bagdad fuffered prodigiously. Kerim Kan, Regent of Persia, by drawing a line of troops along the fron-tiers of his kingdom, prevented it from con-tagion. The chief of the English factory retired to his country house, but the plague purfaing him, he found means to escape to Masest on board a small English vessel. The merchants and other English there, endeavouring to follow his example, embarked on board another yeffel, but had the misfortune to be taken by the pirates of Karek, and carried to Benderik, a port in Persia, where they are treated but indifferently. The sick they lest behind in the hospital all died. The Bilkop of Babylon Aut himfelf up, in hopes to escape the infection by that means; but having lost all his domestics, was forced to go out to procure subliftance, and being seized with the plague, died of it.

The reft were scattered, and in purfuing them two Bassas were made prisoners; after which the Major proceeded, and burnt the castle, with the neighbouring village of

Anadomi. Major Lalach on the fame day met with a detachment of one hundred and fifty horfe, commanded by Haffan Bayraktar, who would not furrender, but fought till eighty were killed, fifteen wounded, and himfelt and the remainder made prifoners.

On the next day a detachment of three thousand Turkish herse, commanded by the Serafkiers of Widdin and Nicopoli, was defeated near the city of Flamund, by Lientenant General Kamenskoy. He pursued them, but in their flight, they fell in with the army of Count Solticow, where they were again attacked; and the greatest part of them made priloners. Among the prifoners are, the Seraskier of Widdin, of three tails, Muffun Baffa, 'nine Bayraktars, two Oda Baffas, one Iman, one Dervis, and about forty Janisfaries; and almost all the hories were taken:

Colenel Prince Kantemier, met on the oth of September with one thousand five hundred Turks near Turna, who were marching to affift Mussun Basia, but came too late. The columnel attacked them with about two thousand Coffacks, and entirely defeated them. About eighty were killed, forty made prisoners, and three Randards and four pieces of cannon were taken. The Coffacks pursued them for some time, and every day brought in prisoners.

Extract of another letter from Worcefer, dated the 22d inflant.

" It is imagined the poll will not finally elde before Thursday : its tedious delay hath been partly owing to the Bribery Oath, partly to the exceptions to frequently taken by the friends of each candidate to the voters, and in a great measure to the perpetual disputes, which more than any thing feem o have ustarded the buffels of the election. Upon a moderate computation it is not fuppoled that the expence attending the contest can fland Mr. Rous in less than one thoufand pounds eath day. On the part of Sir Watkin Lewes, the spirited and independent members of the corporation opened subscriptions to make good the disurfements, and on Friday two thousand pounds were subferibed to defray further contingencies. Befides administering the bribery oath, cautiperjury have been diffributed, and it is prefumed with great faccels, amongst the people, as many freemen to the laft degree diftreffed and in rage, after receiving money, brought it to the hall, threw it with indignation upon the table, and voted for Sir Watkin Lewes. Extract of a letter from Warfaw, Nov. 5. ". We have just received the following advices from the Ruffian grand army. Count Romanzow has been for these two months past fending troops over the Danube in small bodies at different places, in which manner he brought the greatest part of his army upon the opposite shore in an invisible way. The Turkish grand army thinking themselves secure from any hostile attack, were just about taking up their winter quarters, and occupied to get ready their winter baggage, when they were attacked by the Rufians, who came from the woods and mountains of Homaes, and made themselves masters of their artillery. The Turks, by this unexpected attack, were not able to put themselves in a posture of defence, but thought it better to take refuge in a neighbouring fortress; others (and as feveral affert, commanded by the Grand Vizir himfelf) took refuge in the famous fortress of Siliftria, and fome fled father into Romelia towards Adrianople; fo that the Turkish rand army was entirely dispersed. The Ruffians made themselves masters of the camp, took possession of the enemy's entrenchments, and the Coffacks purfued the enemy. These are all the particulars we have been yet able to pick up, but a circumfantial account, properly authenticated, is hourly ex-

NOV. Bischelors, the joined stone of love,

At fist was hindled in the world above;

Worrestra, as between the tendre possion gaves,

Ere my life close a semale friend I doore.

But with set contion I would choose my wife,

Since when the enot is tied 'tis tied for life.

Whether the virgin was extremely foir,

Exast her stadeness, and genteel her air,

Whether her stage was exquisitely sine,

Whether her stage was exquisitely fine,

Whether her stage was exquisitely fine,

Whether her stage was exquisitely sine,

At first may least concern; Beauty, 'tis true,

At first may least concern; Beauty, 'tis true,

At first may least oncern; Beauty, 'tis true,

At first may least once that I might say,

Or grows unbended if it chance to stay.

I would not once define that I might say,

I'm worth my thousands, on my marriage stay;

This looks as if the shining heaps of pelf

Were what I marry'd, and not she her berself.

No, first I would examine if her mind

To tread religion's sacred paths inclin'd;

If this companion to my pouth was given,

How would she guide my erring steps to beaven!

Whether her tempor match'd with mine or not,

Should be the next thing that engag'd my thought,

For I could never dream of real blife,

If she dragg'd that way, and if I dropp'd thing

But if her mind was moulded to my own,

Easy and smooth the thread of life washe run;

And if severe assistions aren'd may be. But if her mind was moulded to my own,

Eafy and smooth the thread of life would run;

And if severe affictions provid our lot,

In motual comforts all would be forgot;

And he work troubles that effail us here

Would lose their sting when honey dwelt so near;

And as my restel pess'd the sea of life,

Blest'd with so pious and so soud a wise,

Not one rude breath of wind sould stop my way,

Nor one small wave disturb the peaceful sea.

The English Grammar-School, T has been thought, that, with boys of a tele-I rable genius, twelve years of age, is a proper time to begin the fludy of latin; but this it is faid must be determined by the extent of capacity. The undertaker, with great deference, begs leave to suppose a greater equality in the genius and powers of children than is generally allowed; and that the apparent inequality proceeds from an early neglect in the cultivation of their little faculties. He is of common if so perfect a mode of education could opinion, if fo perfect a mode of education could be established, that the opening gems of the little mind should be attentively watched for, tenderly cherished when observed, and brought to full growth and vigour by wholesome exercise. If a child be suffered to advance to his twelfth year, before he has been accustomed to the exercitations of a grammar-ichool, he will have contracted such an inactive disposition and aversion to learning, as the bell masters are but rarely able to remove. On the other hand, if before that time he is fent to learn latin, inacceffible fo young, to arguments on its nefourns at the laborious talk, grows disgusted with it altogether, and as Mr. Locke says, "Tis ten to one abhors it all his life, for the ill usage it procured

From an impartial view of these matters, it is prefumed, will appear the great utility, if not the absolute necessity of an English grammar-school, where the faculties of children may be improved by exercises more intelligible, consequently more likely to conciliate the youthful inclination; and where they may be taught the principles of grammar in their own language, with a very clear and familiar determination respecting all the grammatical terms.

With this great and important object in his view, the undertaker of this school, first solicited the in-

dulgence of the public, and, he flatters himself, hitherto he hath discharged his duty, to the entire fatisfaction of those, who have been pleased to entrust him with the care of their children.

Good affortment of European and Raff-India goods, fultable for the legion,

and East-India goods, suitable for the seguen, are continually increased, that very large sums are continually sent abroad for the purchase of it, to the great impoverishment of the Colonies: All the paper which is manufactured among our selves, is a clear saying, to us, of all the money that would be sent out of the country to procure it; it is therefore hoped, that all these who really wish to promote the interest of America, and of this country in particular, with which they are more closely connected in interest, will contribute their aid to the faces of the paper manufactory in this place, by a constant care and attention to says the linear rags, which every family could afford in a greater or less quantity, quite useless for any other purpose, and generally thrown away, but absolutely necessary to a paper manufactory, which cannot be carried on without them.

The smallness of the value of rags in a samily, is apt to make people caroless in faving them, as being seares worth the trouble; but small as the value is, it is more than sufficient, taking one family with another, to supply each with all the faper accessing for its use; and the benefit each will receive in common with the community, will be much greater than their immediate profit by the price of the rags. A certain place set a part in severy house to receive them, and a little practice in faving them, would soon make it habitual to do it, and establish this valuable manufactory upon a permanent soundation.
